Chapter 1

About Kofax Capture Technical Specifications

Kofax Capture automates and accelerates business processes by capturing all types of paper and electronic documents and forms, transforming them into accurate and actionable information, and delivering it all into core business applications, processes and workflows. The technical specifications in this document are specific to Kofax Capture 11.1.0.

A required amount of memory and disk space is provided. You must meet these requirements to support your Kofax Capture system. These requirements specifically list the needs of Kofax Capture and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.

Chapter 2

Product requirements

Product components

Specification	Description
Client Operating Systems	<ul style="list-style-type: none">• Windows 10 (Version 1511 or higher) Enterprise, Professional• Windows 8.1 Enterprise, Professional• Windows 7 Service Pack 1 Enterprise, Professional, Ultimate<ul style="list-style-type: none">• Windows 7 SP1 is required to install the Kofax Capture Standard database (Microsoft SQL Server 2014 Express) and Microsoft .NET Framework 4.6.1
Server Operating Systems	<ul style="list-style-type: none">• Windows Server 2019 Standard, Datacenter• Windows Server 2016 Standard, Datacenter• Windows Server 2012 R2 Foundation, Essentials, Standard, Datacenter• Windows Server 2012 Foundation, Essentials, Standard, Datacenter

Specification	Description
Languages supported	<p>The following Kofax Capture language packs are available:</p> <ul style="list-style-type: none"> • English • German • Portuguese (Brazil) • Spanish • Italian • French • Japanese • Chinese (simplified) • Polish • Russian • Czech • Swedish

Hardware requirements

Server requirements

This section lists the requirements for installing Kofax Capture on a server.

We recommend that you use a dedicated server for Kofax Capture. In particular, we strongly recommend that you do not use the server computer for scanning or importing documents.

Recommended requirements for a Kofax Capture server system are purposely not listed here, as each implementation varies in capacity, load and processing. We do recommend that you try your Kofax Capture processing workload in a test environment before moving it into production.

Minimum hardware requirements for a server

Processor:	2.0 GHz Quad Core
System memory:	4 GB or more
Disk space:	3.0 GB if CaptureSV is stored on the installation server 1.8 GB if CaptureSV is stored elsewhere
Display:	1280 x 1024 with 16-bit color, small fonts; 24-bit color is recommended for the best viewing of online Help
USB port:	Kofax Capture hardware key (if hardware-based licensing is used)
NIC:	100 Mbps

Client and standalone system requirements

This section lists the requirements for installing Kofax Capture on a client workstation and a standalone system.

Minimum hardware requirements for a client workstation

Processor:	2.0 GHz Dual Core
System memory:	2 GB or more
Disk space:	1.5 GB on the local installation drive, plus 300 MB available where your operating system is installed, for installation files, temporary files, and working space during processing
Display:	1280 x 1024 with 16-bit color, small fonts
USB port:	Enhanced Bar Code Engine hardware key (optional)
NIC	100Mbps

Recommended hardware requirements for a client workstation

Processor:	2.0 GHz Dual Core For scan stations: 2.0 GHz Quad Core
System memory:	4 GB or more
Disk space:	1.5 GB on the local installation drive, plus 300 MB or more available on your local drive or where your operating system is installed, for installation files, temporary files, and working space during processing
Display:	1280 x 1024 with 24-bit color, small fonts; 24-bit color is recommended for the best viewing of online Help
NIC:	1 Gbps

Minimum hardware requirements for a standalone system

Processor:	2.0 GHz Dual Core
System memory:	2 GB or more
Disk space:	1.7 GB or more on the local installation drive, plus 300 MB or more available on your local drive or where your operating system is installed for installation files, temporary files, and working space during processing
Display:	1280 x 1024 with 16-bit color, small fonts; 24-bit color is recommended for the best viewing of online Help
NIC:	100 Mbps

Recommended hardware requirements for a standalone system

Processor:	2.0 GHz Quad Core
System memory:	4 GB or more
Disk space:	1.7 GB or more on the local installation drive, plus 300 MB or more available on your local drive or where your operating system is installed for installation files, temporary files, and working space during processing
Display:	1280 x 1024 with 16-bit color, small fonts; 24-bit color is recommended for the best viewing of online Help
NIC	1 Gbps
